

CASE STUDY

Company name: Sentry Farms Ltd
Business sector: Agriculture
NHDS product: Agri-Trak
Application: Grain dryer monitoring and associated critical farm operations

“With margins being eroded we are continually under pressure to increase staff efficiency, it’s therefore not always possible to deploy labour in supervisory roles, often resulting in expensive losses when for example, a grain dryer develops a fault. Installing Agri-Trak to monitor critical functions has meant we can divert attention where the need is greatest, confident that in the event of equipment failure staff are informed immediately via their mobile phones, regardless of their whereabouts” Giles Budgen, farm manager Sentry Farms Ltd.

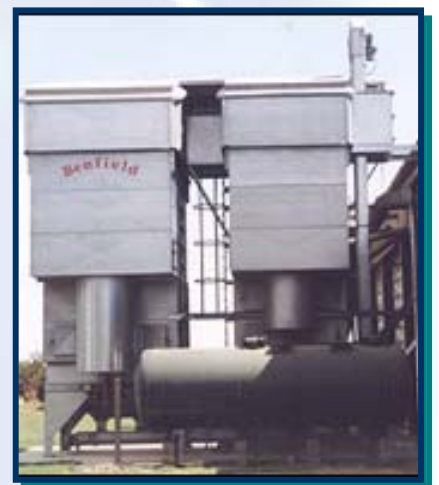

APPLICATION

To monitor agricultural buildings, machinery and equipment, reporting “out of parameter” conditions as alarms sent as SMS text messages to existing mobile phones:-

- ⇒ Burglar/fire alarm activated
- ⇒ Oil/Fuel level low
- ⇒ Power supply interrupted
- ⇒ Temperature high/low
- ⇒ Humidity high/low
- ⇒ Equipment location
- ⇒ Driver needs assistance

OPERATIONAL BENEFITS

- ✓ Increased operational efficiency
- ✓ Health & Safety compliance
- ✓ Peace of mind & security
- ✓ Less risk of insurance premium rises
- ✓ Increased bottom line profits
